Gaming law requires landside facilities to be inspected prior to commencement of gaming operations annually and as requested by the Board and requires a licensee to hold a Board-issued certificate of compliance. The State Fire Marshal is authorized to inspect the riverboat landside facilities seeking a license or a certificate of compliance from the Board.

The Division has not received the Office of State Fire Marshal's inspection report for the Licensee's landside facility. The inspection report is required before the Board can issue a certificate of compliance to ensure that there are no apparent deficiencies or cautionary codes cited and that the COC may be issued.

Given that the Division's pre-operative inspection is ongoing and certain required documents remain outstanding, it is recommended that the certificate of compliance of the landside facility be issued at the time that the Division provides written confirmation of substantial completion of the landside facility for the opening date.

In its petition, the Licensee requested the Board grant the Chairman the authority to issue approvals necessary for the Licensee to officially commence gaming operations. The Board may authorize the Chairman to determine substantial completion and approval to commence gaming operations subject to further inspection and approval by the Division.

If necessary, the Division will notify the Chairman of any issues or deficiencies that occurred during the mock opening and/or the official opening date that would require the Licensee to cease gaming operations at its landside facility until such time as the issues or deficiencies have been corrected to the satisfaction of the Division.
