And so I'm its national -- its kind -- its natural 7 going to talk about some of that data that 7 state. 8 kind of supports what I'm framing out for 8 And if you look down at the table a 9 you right there. 9 little below that, I'm going to start to 10 First, what I'd like to talk about 10 talk a little about Mobile Sports Betting. is just a little bit about some statistics 11 11 You can see clearly that there's a 12 that trend over the years. Last July, significant increase in the calls that 12 13 just last month, the National Problem --13 come in to the Problem Gambling Helpline the National Council for Problem Gambling 14 14 as we legalize Sports Betting in 15 had their annual conference in Ohio. And 15 Louisiana, especially Mobile Sports 16 it was a great opportunity to get with 16 Betting. 17 other states, talk about the trending And that trend is continuing. And 17 18 they're seeing and seeing what's happening 18 the last graph shows for calender year at the national level beyond just doing my 19 19 2025. We're on track to probably get 20 own research. 20 somewhere between low 90s to high 80s on 21 21 the calls coming in. I'm giving you real We're seeing that the calls that are 22 coming in with the Problem Gambling numbers here because as we talk about 22 23 Helplines have been fairly consistent. We 23 percentages and impact and calls coming 24 saw a spike in those calls coming in 2.4 in, I think it's relevant that we speak to 2.5 around COVID, and we saw that spike across 25 real numbers. 23 24 1 1 are available to them as well. So I think LACG is not for or against gambling. 2 In fact, we enjoy a very strong 2 it's important to look at how we're seeing 3 relationship with casino properties across 3 increases in those calls as well. 4 the state. And we know that most 4 I'm going to draw some comparisons 5 individuals that go into these properties 5 to some national studies that are out 6 and gamble are not going to have a 6 there, and you'll see the reason for that 7 7 problem. It's how we address the ones in this particular slide. So I'm making 8 8 some comparisons to New Jersey. There is that do end up having problems. 9 9 a lot of differences between the state of I'm just going to add a special 10 mention here, because there are two call 10 Louisiana and New Jersey. There's some 11 centers that answer for the Louisiana 988 11 commonality that I feel like we can learn 12 12 Lifeline; it's LACG and VIA LINK. And so from it. Some experiences that they've 13 as we're seeing some of these trends on 13 had, that we may not have to learn on our 14 the calls that are coming in to Problem 14 own. So Rutger -- through Rutgers 15 Gambling, I wanted to include that we're University, their most recent Prevalence 15 seeing an increase in Problem Gambling Study -- or actually one of their prior 16 16 17 17 Prevalence Studies was in 2017. Their calls that are coming in actually to the most recent is in 2023. For the State of 18 988 line. There's been a -- a large media 18 19 campaign to get awareness out there 19 Louisiana, they -- and they legalized 20 20 nationally about the availability of this Mobile Sports Betting in 2018, four years 21 three-digit line. And so often times 21 ahead of us. Our most recent Prevalence 22 those that might be having problems with 22 Study was 2017. And I -- I know that the 23 23 gambling or loved ones with problems with Department of Health, Office of Behavioral 24 gambling, they're reaching out to 988 not 24 Health is finally finalizing their most 25 thinking about the other help lines that 25 recent Prevalence Study. I haven't seen

25 26 1 it. I don't know what is in it, but I 1 elevate a risk of developing Problem 2 know they're -- they're at a point they're 2 Gambling and potentially evolving into 3 going to be able to release that in -- in 3 gambling disorder. the near future. Because it's not 4 Of the emerging adults into 4 5 released right now, I was looking at some 5 gambling, there is also an increased risk 6 of the information that is coming out 6 in drug use, overeating, binge eating, 7 nationally, and from New Jersey that might 7 excessive video or internet gaming, and of 8 be some indications for us to pay 8 course, suicidal thoughts. Among those 9 attention to as we move forward in 9 struggling with addictive disorders, which 10 responsible gaming, addressing the needs 10 ob -- you know, obviously that we are an of Problem Gambling through prevention and 11 11 industry in Problem Gambling looking at education and that kind of thing. very similar effects. Those struggling 12 12 13 So some of the trends that we're 13 with problem gambling have the highest seeing out there. Online gaming is 14 14 suicide rates of other addictions. increasing significantly. In fact, some 15 15 In emerging adults are younger, 16 states are seeing this at an increase of mostly represented by males; however, 16 17 three times of prior years, and I think female engagement is on the rise. So I've 17 that is something for us to pay attention 18 got three children. They're not children 18 to. And while not increasing at the same anymore. One is an adult with two kids of 19 19 rate, those that choose to gamble and mix 20 20 his own, living in Michigan. The youngest two are 18 and 19 and in school here in 21 the venues is also on an increase from 21 22 what we've seen in prior years. And I 22 the State of Louisiana. And when I read 23 bring that up because the more an 23 information and see studies talking about 24 individual chooses to game in different 2.4 excessive video or internet gaming time, 2.5 types of platforms and venues, it does 25 streaming time, I know that to be true 27 28 1 with my own kids. I look at that and have 1 celebration for us because we hosted it 2 those conversations with them on a daily 2 here in the State of Louisiana, it was 3 basis. So there are some things that are 3 also a bit of a surprising game for those 4 very natural in their environment that's 4 of you who watched the game. It was a bit 5 5 of a blowout for the Eagles. And so I very common between them and their peers 6 6 think there was a lot of money lost. that links itself to mobile betting. 7 7 There was a lot of in-game betting that Among those aged 21 to 24, there's a 8 8 measurable increase in sports betting. was going on trying to recover some money, 9 and some winnings that I'm -- I'm sure 9 And I would like to point out notably 10 happened. But if you look at the volume 10 within I-gaming -- with in-game betting and parley betting. Both of these are 11 of the calls we had the prior year come in 11 12 12 very high risk. Often at times that the to our Helpline Call Center compared to 13 13 what came in in 2025 and what ended up games are happening can be very impulsive. 14 being a very unpredictable game, it was an 14 And the younger generation are those 15 increase of 44%. And one other thing that 15 entering into the gaming as entertainment I would like to call out while I'm showing 16 16 are less likely to utilize some of the 17 you this slide, is there's actually two 17 mobile platform responsible gaming limit 18 bar graphs here, and you can barely see 18 functions that are there. So they may --19 the orange one. These are calls taken 19 they bet more than they intended and more 20 into the center, and then the orange are 20 often than they intended during a 21 actual intakes that were completed. So we particular activity. 21 22 had a lot of calls coming in, that once we 22 And I'm going to highlight this 23 answered the line, I'm sorry I have the through the next two slides. Motivation made it, may have 5 same two comparisons of Superbowl 6 been a complaint, trying to get a bet in, 6 weekends, but I had mentioned earlier that 7 who knows what it might have been. And 7 we answer for more than just the State of 8 that's normal for us. We do get a lot of 8 Louisiana. So if you notice here on Superbowl Sunday 2024 when we include all 9 calls, that once we answer the line it's 9 10 I'm sorry, I didn't mean to call you. 10 of the gambling lines that we're answering for, there were 858 calls that came in. 11 11 I'm also pointing this out because 12 there's a lot of ambivalence with those 12 That's a lot of calls in one day. That 13 was a very busy Call Center. And we only 13 struggling with Problem Gambling. And 14 staff up for situations like this when we 14 what we've learned is it a takes a lot of 15 know it's predictable that we are going to 15 calls into the Helpline before we actually 16 walk someone through a complete intake 16 have a higher than usual call volume. We 17 where we can make some referrals and 17 didn't expect 1,397 calls that happened in 18 recommendations and help to engage them 18 2025. So I just kind of want that to soak into treatment. And that ambivalence is 19 in a little bit. That's a significant 19 20 -- brings them to making the call, but not 20 increase; and, actually, that is a 63% 21 21 being comfortable following through the -increase over the prior year. And when I 22 with the call. It could be ten and twenty 22 talk to you about parleys and in-game 23 23 betting, I'm confident that there is a times, and it could be over a span of 24 2.4 years this happens to individuals. And correlation between these two, but I will 2.5 25 when that happens, the financial damage also openly say I express that only to be 31 32 1 what I believe to be a correlation. There 1 lot of those individuals can reel it back 2 is national research that parley and 2 in, and this can be a form of 3 in-game betting is on the increase and 3 entertainment that they enjoy. Some of 4 with our younger population that's 4 those individuals, it grows further down 5 stepping into gaming. So I just take the 5 that line into Problem Gambling and next step from there to make that 6 6 Gambling Disorder. And that's where we 7 7 comparison for awareness. speak up and try to be of help. 8 8 So the geography of Prevalence of All right. And I am -- I promise 9 I'm winding up. So this is a continuum of 9 gambling. So according to the National Council on Problem Gambling, approximately 10 Problem Gambling. It's a very simple 10 11 chart, but I bring this to the forefront 11 3-4% of the adult population meets the 12 because most individuals -- most of us in 12 criteria that I had expressed just a 13 13 moment ago. An interesting stat that I the State of Louisiana, we fall within think is going to really evolve over time 14 non-gambling, recreational gambling, and 14 is a person living within 50 miles of a 15 maybe a few at at-risk gambling. And when 1.5 casino is twice as likely to develop 16 I say most of us, by in large, the 16 17 population of us in this state, that's 17 Problem Gambling than those who are 18 where we fall. And if you've ever been to 18 further than 50 miles away. It will be a party and had more drinks than you 19 19 interesting to see how this changes as 20 intended to have and regretted it the next 20 more and more gaming and gambling becomes day and you're not an alcoholic, a lot of 21 21 virtual. 22 those people fall into this at-risk 22 In Louisiana -- and again this is gambling category. There may have been an the 2017 study, the most recent Prevalence 23 23 24 event that they bet too much on, they 24 study is -- is not quite published yet --25 regretted it, wished they hadn't. And a 25 revealed that approximately 179,000
